

Metal-Free Spine Fixation Master Class

January 18, 2023 - 8 pm EST

Is it time to consider a metal-free, tissue-sparing approach to spine fixation and stabilization?

Learn more from our renowned Master Class faculty.

Cortico-pedicular fixation with curved drill & PEEK implant

Pierce Nunley, MD
Spine Institute
of Louisiana,
Shreveport, LA

Douglas Crowther, DO
Orthopedic Centers
of Colorado,
Colorado Springs, CO

J. Bridger Cox, MD
Neuroscience
Specialist,
Oklahoma City, OK

Robert Eastlack, MD
Scripps Health,
San Diego, CA

Karma[®] MIS
Posterior Fixation System

Join Our Master Class to Learn More about this **MIS Ultra[®]** Technology

Master Class attendees will learn about **Karma[®] MIS**, which consists of a single set of instruments, a proprietary curved drill and a universal PEEK strap implant. **Karma[®] MIS** minimizes tissue trauma without the use of screws and rods while providing similar fixation and comparable stability to pedicle screw constructs with less stress shielding of the anterior column.¹
